

Azure Storage Explorer setup

Download Azure Storage Explorer:

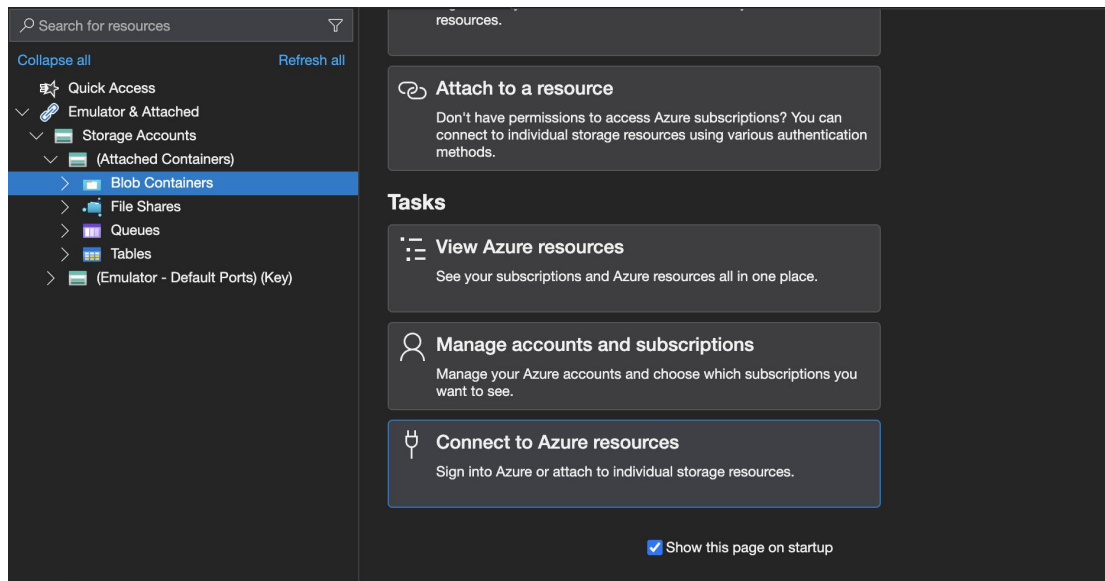

<https://azure.microsoft.com/en-in/products/storage/storage-explorer/>

Open the Azure storage Explorer application:

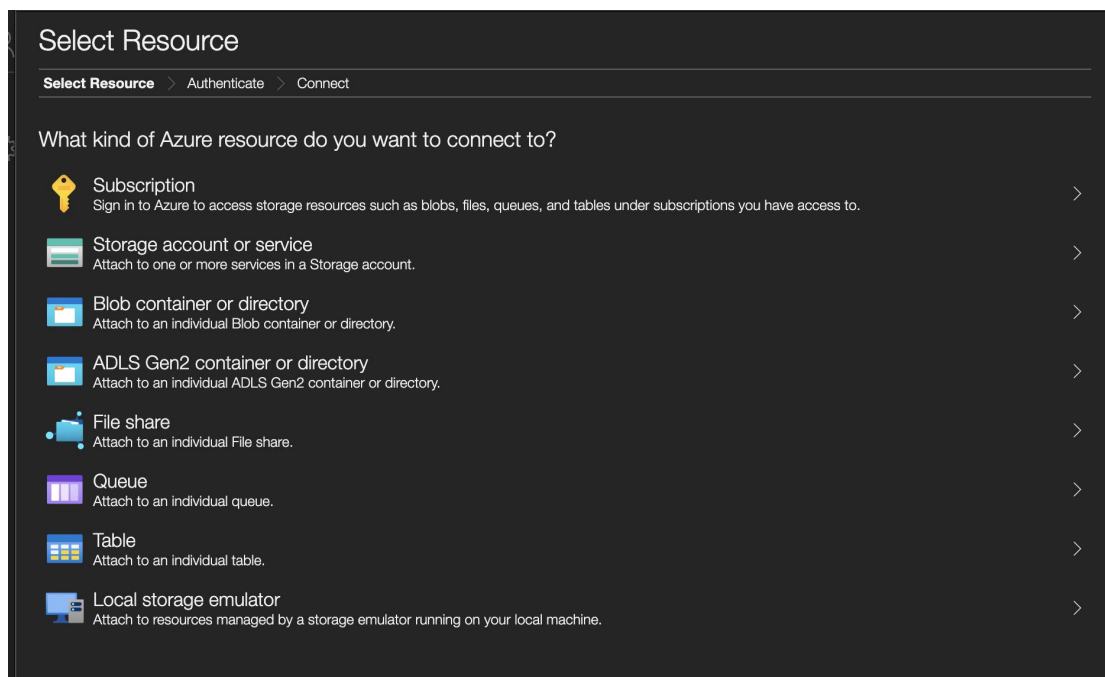

- Now select the **Storage Accounts**.

- Select the **Blob containers**.

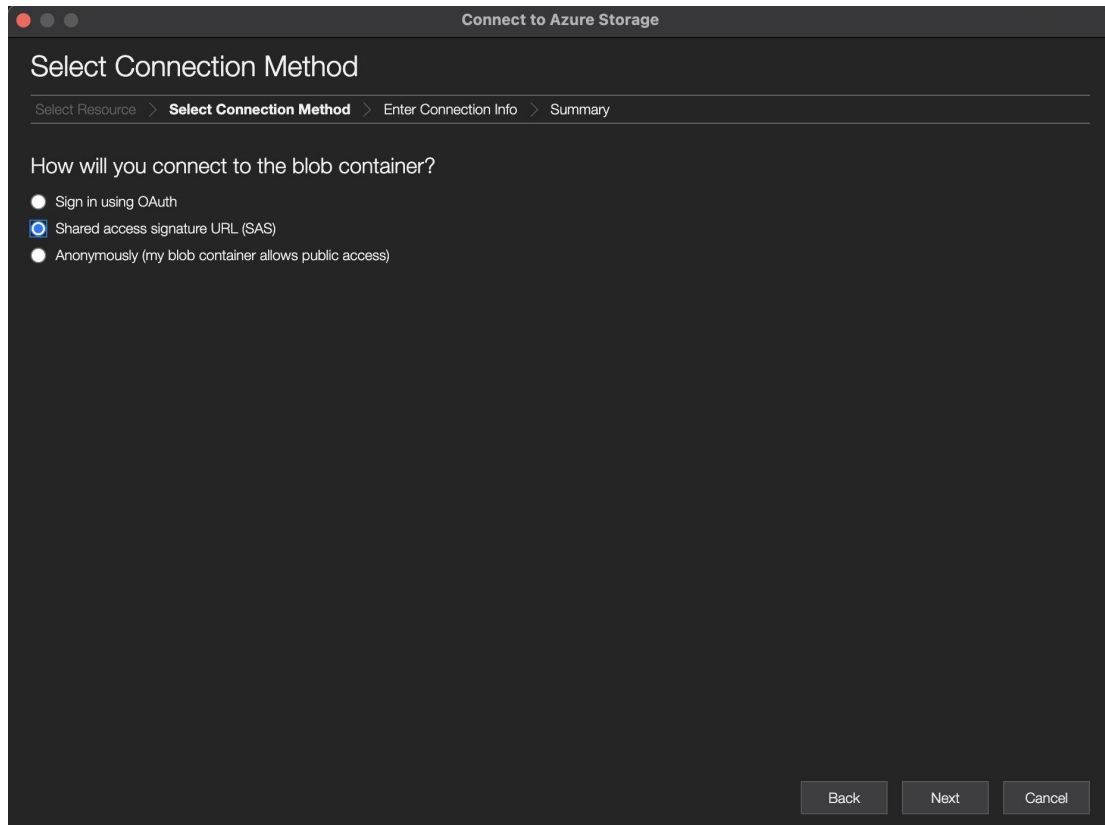

- Now Click on **Connect to Azure Resources**.

- Followed by click on the **Blob Container or directory**.

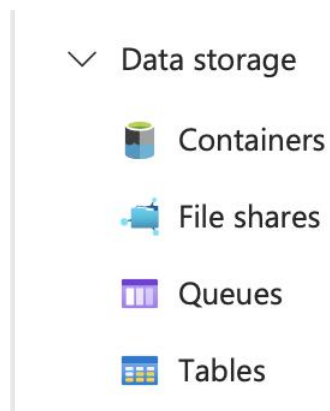

- Here, Select the **Shared access signature URL(SAS)** option.

Then Click on **Next**.

MicroSoft Azure Account:

- Now Open your Microsoft Azure account.
- Then Open your **Storage Account**.
- Click on the **Data Storage > Containers** in the **menu**.

- Then click on the **Shared Access Tokens**.

Metadata

A shared access signature (SAS) is a URI that grants restricted access to an Azure Storage container. Use it when you want storage account key. [Learn more about creating an account SAS](#)

Generate SAS token and URL

- In here, select all the **Permissions** given in the drop down menu.
- Finally click **Generate SAS token and URL**

- Then copy the **Blob SAS URL**
- Now paste the URL in the **Azure Storage** in the URL area.
- Click next

The screenshot shows a macOS-style window titled "Connect to Azure Storage". Inside, the "Enter Connection Info" tab is active, with a breadcrumb trail: "Select Resource > Select Connection Method > Enter Connection Info > Summary". Below the breadcrumb, there's a "Display name:" label followed by a text input field. Underneath that is a label "* Blob container or directory SAS URL:" followed by a larger text input field. At the bottom right, there are three buttons: "Back", "Next", and "Cancel".

- Now your **Container** is connected in the **Azure Storage Explorer**
